DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-16, drawn to a method of forming a device, classified in class
 438, subclass 151.
- II. Claims 17-24, drawn to a device made, classified in class 257, subclass 359.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product may be formed by a materially different process, for example instead of forming the layers and then patterning them in a photolithography process, the features may be formed by selective deposition.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Ms. Lee was contacted on January 28, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
